PROFESSIONAL SUMMARY

Infrastructure and Network Support professional with hands-on experience designing, deploying, administering, monitoring, and troubleshooting enterprise-style Linux infrastructure and segmented networks. Built and maintain a production-style homelab featuring 7+ VLANs, layered DNS architecture, Docker services, reverse proxy infrastructure, centralized monitoring, and secure remote administration.

Experienced supporting Linux systems, DNS, VPNs, routing, firewalls, containers, and enterprise network services while documenting architecture, incident response, recovery procedures, and operational standards.

Nearly 20 years of customer-facing experience across banking, financial services, airline services, and operations. Google Cybersecurity Professional Certificate holder pursuing CompTIA Network+.

TECHNICAL SKILLS

- Operating Systems: Linux (Debian, Parrot OS, Fedora, CachyOS), Windows, macOS
- Networking: TCP/IP, IPv4/IPv6, VLANs, Inter-VLAN Routing, ACLs, DNS, DHCP, NAT, VPN, SSH, SNMP, mDNS, Wi-Fi
- Infrastructure: Docker, Docker Compose, Portainer, Technitium DNS, AdGuard Home, Caddy, Cloudflare, Cloudflare Pages, Git, GitHub, Tailscale, TP-Link Omada

- Monitoring: Grafana, Prometheus, LibreNMS, Uptime Kuma, Node Exporter, cAdvisor
- Troubleshooting: Wireshark, tcpdump, dig, curl, nmap, journalctl, systemctl, Bash, Linux CLI

INFRASTRUCTURE ENGINEERING PROJECTS

- Designed and deployed an enterprise-style TP-Link Omada network supporting 7+ VLANs with Layer 3 routing, ACLs, and mDNS.
- Implemented layered DNS architecture using Technitium DNS and AdGuard Home supporting 3 internal DNS zones.
- Built a monitoring platform providing visibility across 20+ self-hosted services using Grafana, Prometheus, LibreNMS, and Uptime Kuma.
- Designed secure remote administration using Cloudflare, Caddy Reverse Proxy, SSH, and Tailscale VPN.
- Deployed and administer Docker services including Vaultwarden, LibreNMS, Home Assistant, ESPHome, Matter Server, Homepage, Portainer, and Technitium DNS.
- Maintain a public portfolio documenting architecture diagrams, incident reports, and technical case studies.

PROFESSIONAL EXPERIENCE

Operations & Customer Support Specialist — Sidco LLC (2025–Present)

- Investigate and resolve operational and customer issues using structured troubleshooting methodologies.
- Document incidents, resolutions, and operational procedures.
- Coordinate issue resolution across multiple departments.
- Deliver high-quality customer support.

Banking, Financial Services & Customer Operations (2005–2025)

- Delivered exceptional customer service across banking, credit union, financial services, airline services, and operations.
- Resolved high-volume customer issues while maintaining professionalism, accuracy, and confidentiality.
- Collaborated across departments to resolve operational issues.

- Protected confidential financial and customer information.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- CompTIA Network+ (In Progress)
- Technical Support Fundamentals – Coursera

EDUCATION

Associate Degree – Healthcare Office Administration
Samuel Jackman Institute of Technology

ADDITIONAL INFORMATION

- Authorized to work in the United States (Green Card)
- Available immediately
- Open to onsite, hybrid, remote, and travel positions
