PROFESSIONAL SUMMARY

Infrastructure and Network Support professional with hands-on experience designing, deploying, monitoring, and troubleshooting enterprise-style Linux infrastructure. Built and administer an enterprise-style homelab featuring 7+ VLANs, layered DNS, Docker services, infrastructure monitoring, and secure remote administration.

Experienced supporting Linux systems, DNS, VPNs, Docker, routing, firewalls, and infrastructure monitoring while documenting architecture, incident response, and recovery procedures.

Nearly 20 years of customer-facing experience across banking, financial services, airline services, and operations. Google Cybersecurity Professional Certificate holder pursuing CompTIA Network+.

TECHNICAL SKILLS

Operating Systems

- Linux (Debian, Parrot OS, Fedora, CachyOS)
- Windows
- macOS

Networking

- TCP/IP • IPv4/IPv6 • VLANs • Inter-VLAN Routing • ACLs • DNS • DHCP • NAT • VPN • SSH • SNMP • Wi-Fi

Infrastructure

- Docker • Docker Compose • Portainer • Technitium DNS • AdGuard Home • Caddy • Cloudflare • Tailscale • TP-Link Omada • Git/GitHub

Monitoring

- Grafana • Prometheus • Uptime Kuma • LibreNMS • Node Exporter • cAdvisor

Troubleshooting

- Wireshark • tcpdump • dig • curl • journalctl • systemctl • nmap • Linux CLI • Log Analysis

INFRASTRUCTURE ENGINEERING PORTFOLIO

- Designed and deployed a 7+ VLAN enterprise-style network using TP-Link Omada with Layer 3 routing, ACLs, mDNS, and secure segmentation.
- Implemented layered DNS using Technitium DNS and AdGuard Home supporting three internal DNS zones.
- Built a monitoring platform using Grafana, Prometheus, LibreNMS, Uptime Kuma, Node Exporter, and cAdvisor monitoring 20+ self-hosted services.
- Deployed and administer Docker services including Vaultwarden, Portainer, Home Assistant, ESPHome, Matter Server, LibreNMS, Homepage, and Technitium DNS.
- Authored detailed architecture diagrams, incident reports, recovery procedures, and operational documentation.

Published Technical Case Studies

- Multi-VLAN Network Segmentation
- Layered DNS Migration
- Vaultwarden Recovery & Hardening
- Monitoring & Observability Platform

PROFESSIONAL EXPERIENCE

Operations & Customer Support Specialist

Sidco LLC | 2025-Present

- Troubleshoot operational and customer issues.
- Document incidents and coordinate issue resolution across teams.
- Deliver high-quality customer support.

Banking, Financial Services & Customer Operations

Multiple Organizations | 2005-2025

- Delivered exceptional customer service in banking and financial environments.
- Resolved high-volume customer issues while protecting confidential information.
- Collaborated across departments to resolve operational issues.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- CompTIA Network+ (In Progress)
- Technical Support Fundamentals - Coursera

EDUCATION

Associate Degree - Healthcare Office Administration

Samuel Jackman Institute of Technology

ADDITIONAL INFORMATION

- Authorized to work in the United States (Green Card)
- Available immediately
- Open to onsite, hybrid, remote, and travel positions
